

# School Facilities

The school boasts excellent facilities both on-campus and off. Beautiful old buildings combine with state-of-the-art modern facilities.

The charm of attractive heritage buildings is complemented by the modern facilities in the main teaching areas. Fully-equipped physics, chemistry and biology laboratories, computer and language suites, music rooms and a recording studio are all part of the greater learning environment. The library has kept pace with all developments in research and information technology. A food technology suite is a recent and popular addition to our facilities. A drama room, technology workshops, and an E.S.O.L suite provide learning opportunities for boys at all levels and of all abilities.

Despite its location in the middle of the city, **Otago Boys' High School** is able to offer excellent sporting facilities for the large number of boys who are involved in a wide range of activities. On-campus facilities include a gymnasium and weight training complex, a heated swimming pool, eight cricket nets and a similar number of tennis courts. A short distance away, teams and players make full use of the schools rowing shed and equipment, Balmacewan golf course, and the Caledonian athletics complex, as well as enjoying immediate access to the neighbouring Moana Pool swimming and fitness complex.
